

Professional Services Certification Management

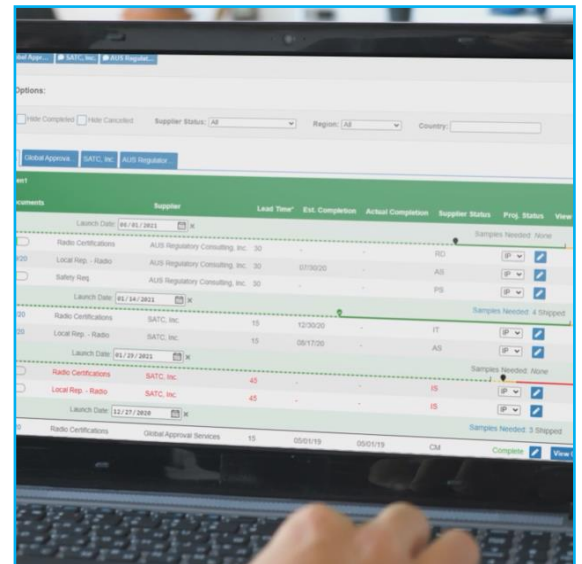

TRANSFORMING
GLOBAL PRODUCT
CERTIFICATION

**There's A Better
Way**

As a global certification technology and service provider, we offer end-to-end product certification management and a service provider marketplace representing over 200 countries and territories.

We work directly with our network of qualified global suppliers, in-country labs, and consultants to provide greater control, transparency, and insight not currently offered with legacy practices.

Professional Services use the latest technologies and a unique understanding of manual legacy inefficiencies and inherent risks associated with global product certification.

Professional Services

If you lack resources or Global Market Access (GMA) experience, our industry professionals will obtain global country certifications for you.

- Fast quote turnaround and competitive pricing
- Knowledgeable project managers with industry experience
- Use of advanced global certification tools that ensures every aspect of the process is tracked, completed, and saved
- Client access to real-time status reports 24/7 with automatic updates
- Secure document upload portal for greater transparency and control
- Optional access to smart repository and certification tracking system

Professional Services Powered by AccessManager

Our Testing, Inspection, Certification (TIC) professionals provide a competitive quote, support a documentation checklist for all country requirements, manage all country certifications, work with country certification providers, and deliver country certifications, change management, and expiration renewals, so you never miss a deadline.

Client access to Uploader and Status page for greater transparency and project control, 24/7

COMPANY OVERVIEW

- Global Validity evolved from the TIC (Testing, Inspection, Certification) industry (TUV Rheinland, 7layers/Bureau Veritas, UL)
- Developer of a cloud-based, tech-enabled Global Regulatory Certification platform and marketplace that supports over 200 countries and territories (US/CAN/EU managed by partner labs)
- Do It Yourself (DIY) Services & Professional Services business models
- Platform inclusive of SaaS-enabled marketplace that provides manufacturers up to three competitive quotes per country (DIY model)
- Projects are 100% managed in the platform with modern productivity tools that replace inefficient manual legacy processes
- Automated workflows, 24/7 insight, transparency, and significant risk reduction

Schedule a demo that will take you beyond outdated manual legacy practices.
