How Access Manager Works

Access Manager is a cloud-based enterprise solution that enables you to work directly with premier in-country certification laboratories, agents, and consultants, all through one platform. Our solution provides end-to-end management of every aspect of your Global Market Access (GMA) process, from requesting quotes and placing orders to managing projects and tracking certifications.

Global Validity

Take total control of your GMA process

The Advantages of Access Manager

Reduce the risk of losing tribal knowledge, missed deadlines, expired certificates, or middle-man drain.

Certification Repository with Advance Expiration Notification

- Store certifications and receive automated expiration email notifications

Technical File Builder

- Automatically build product technical files that support each country certification

Comprehensive GMA Project Management

- Maintain unparalleled control and insight over all open projects

Real Time 24/7 Status Report

- Ensure full transparency into every project by country

Access to In-Country Test Labs

- Plug into the very same subcontract network used by Global Validity and GMA service providers

Quoting

- Take advantage of supplier direct pricing request and receive quotes for all your GMA needs

Communicate

- Organize all project communications between internal and external stakeholders through integrated messaging functions

Dashboard

- Track all important notifications through an automated view
