Global Validity

Experience the next level of Global Market Access

People and Technology make the difference

Our tech-enabled GMA experts use **Access Manager**, a proprietary platform, to manage your country certification projects with the highest level of transparency and efficiency, ensuring predictable certification outcomes.

Verified Document and Sample Requirements

Access a single project checklist verified by each certification body.

Smart Technical Document Repository

Documents are requested once and securely stored for repeated use.

Comprehensive Country Project Status

Continuously updated status reports direct from country partners available in real-time.

Certificate Tracking

Smart expiration monitoring that provides timely email notifications for certificate expirations.

Product launch date tracking

Proactively managed certification milestones to ensure on time deployment.

Project Storage

All project communication, documents, reports & certificates are securely stored, organized, and ready to support additional countries or renewal.

Radio Type Approval

Product Safety

Telecom Certification

EMC Certification

Encryption

RoHS

WEEE Equivalent
